Welcome David Pardell

Software Developer Summer Intern

David has joined Can/Am Technologies this summer as a Software developer Intern where he will be providing support to our growing software development team.

David is a recent graduate of the Computer Engineering Technology program at Northern Alberta Institute of Technology (NAIT) and is looking forward to joining the Can/Am team for the summer!

David has a strong passion for software development and computer science. In the fall, he will begin a Bachelor of Science – Specialization in Computing Science at the University of Alberta, where he will seek to expand his knowledge and experience into fields like machine learning and AI. During his time at NAIT, he developed a strong foundation of practical skills that he hopes to build on while interning at Can/Am. David recently commented "I am looking forward not only to furthering my skills, but also to being in a professional software development setting where real-world problems are being solved."

In his free time David enjoys continuing to learn about and experimenting with core programming concepts including operating systems, compilers, and programming languages. When he chooses to take a break from computers, he likes to get outside and play a variety of sports, which in his words "provides a much-needed balance to (his) life."

Please join us in welcoming David to the Can/Am family for the summer.

About Can/Am Technologies, Inc., and the Teller Cashiering Solution

For over 20 years, Can/Am Technologies, has provided powerful state-of-the-art cashiering solutions to local and state government clients across North America. Can/Am's Teller Cashiering Solution is a full featured browser-based Cashiering / Point of Sale/Online system that delivers robust reporting, collection, and management functionality. Teller's modern integration technology is praised for being intuitive and easy-to-use while also able to be seamlessly incorporated into a multitude of software integrations. Can/Am has earned a solid reputation for providing high level ongoing hands-on client support. Can/Am is SOC2 certified.
